

# NOTICE

## Invasive Milfoil Areas

Eurasian Water Milfoil has been found in several areas within Lake Cobbosseecontee. It is an extremely aggressive plant that can displace native plants and damage wildlife, recreation, and property values.

Efforts are being made to clear these plants and return the areas to full access. Please aid our efforts by temporarily avoiding these areas to reduce further spread.

- No boating and jet skis
- No fishing
- No kayaks or paddleboards
- No pets
